

Course Outline

ADT 2005 Foundation - 3 Days

Course Details

Autodesk Architectural Desktop 2005 for Windows software. Note, any version of ADT can be used for closed company course requirements.

Overview

It is intended for those who require the necessary knowledge and skills (demonstrated by "hands on" exercises) to enable 3D architectural models to be produced efficiently, viewed from any angle, given a realistic visualisation and finally given a 2D output plot setup.

Pre-Requisite

Previous (good) knowledge of AutoCAD 2005.

Duration

3-days

Objectives

On successful completion of the course, the attendee will be able to:-

- Create space planning, conversions and concepts
- Set-out walls including alignments and utilities
- Insert doors and windows using standard supplied templates
- Pick and place furniture
- Create floor and ceilings
- Generate roofs, fascia, soffit and chimney construction
- Construct and modify industrial buildings including multiple floor levels
- Create staircases and stairwells
- Generate sections, views, perspective views including plot layouts
- Render the building model for realistic visualisation
