

Course Details

AutoCAD 2D based on AutoCAD 2008 / LT2008 software. Note, any version of AutoCAD can be used for dedicated company course requirements.

Overview

It is intended for those who require more advanced knowledge and skills to enable 2D drawings to be created with greater productivity. Previous foundation AutoCAD training knowledge is essential for this course.

Duration

1-day

Objectives

On successful completion of the course, the attendee will be able to use more productive advanced 2-D drawing techniques:-

- Configure and use of external drawing references (X-refs) demand loading options
- Attribute creation and manipulation.
- Creation and setup of multiple layouts (paper space) including page setup.
- Creation and manipulation of Tables
- Advanced use of Text and Dimensioning Styles.
- Configure layer filters for productivity.
- Setup and modification of multiple-lines
- Advanced hatching procedures
