

Crystal Reports Web Report Management and Business Views Overview

Duration 1 Day

Description	Who Should Attend
<p>This 1-day course provides an overview of the Business Objects Enterprise system, which is part of the Crystal Reports Server edition.</p> <p>An overview is also provided of the Business Views Manager.</p> <p>Business Views allows for managed connections to databases and is a key part of providing secure access to data.</p>	<p>Delegates attending this course may already have an extensive knowledge of earlier versions of Crystal Reports and may be thinking of upgrading from Standard or Professional versions to the Crystal Reports XI or 2008 server edition.</p>
<p>On completion of this course, delegates will be able to publish and manage reports on a day-by-day basis using the software provided with Business Objects Enterprise.</p> <p>They will be in a position to properly appreciate the benefits to their business on investing in the Server edition software.</p>
