

Course Outline

Advanced Photoshop ~1 day

This popular short course shows individuals how to apply ideas using more advanced techniques and to refine existing understanding of a range of topics.

Aimed at people with existing knowledge of the processes ideas, the course uses some basic techniques and applies them in new ways. This has provided practising design and photographic related staff an opportunity to push their own skills to a higher level through a series of pre-planned and thorough step by step guides

Topics covered:

- Image and production issues overview level 3
- Layer work, blending and layer masking
- Selections, clipping paths, colour masks
- Colour models, modes. RGB & CMYK issues
- Channels, Alpha channels
- Local and generic retouching
- Image quality and sharpening
- Adjustment layers

The structure of this 1 day course is designed to develop current understanding, with through detailed demonstrations and group discussions.

The tasks are ordered in a way to show and learn and progress with more complex approaches based on well understood principles. Each example offers an opportunity for your own creative input. The aim of this advanced course is to give real techniques to apply to everyday image scenarios.

Although printing related issues are covered there will be no time to print any work during the day.

Train-IT.co.uk Ltd also offer a one day or a two day Introduction and also an Intermediate course.
